# UPDATE PROGRESS

The image displays two screenshots of the phpMyAdmin interface, illustrating the progress of a database update.

**Top Screenshot: Database Structure**

The top screenshot shows the 'Database: highsnoebity' structure page. The left sidebar lists the database schema, including tables like `brands`, `categories`, `orders`, `order_items`, `products`, `product_categories`, `users`, `information_schema`, `mysql`, `performance_schema`, `phpmyadmin`, `restapi_praktikum`, `test`, and `testlaravelusk`.

The main area displays a table list for the `highsnoebity` database. The table `products` is highlighted, showing its structure:

Tabel	Tindakan	Baris	Jenis	Penyortiran	Ukuran	Beban
<code>brands</code>	[Icons]	11	InnoDB	<code>utf8mb4_general_ci</code>	16.0 KB	-
<code>categories</code>	[Icons]	7	InnoDB	<code>utf8mb4_general_ci</code>	32.0 KB	-
<code>orders</code>	[Icons]	7	InnoDB	<code>utf8mb4_general_ci</code>	32.0 KB	-

<b>7 tabel</b>	<b>Jumlah</b>	<b>110</b>	<b>InnoDB</b>	<b>utf8mb4_general_ci</b>	<b>208.0 KB</b>	<b>0 B</b>

The bottom section shows the 'Create new table' form with the following fields:

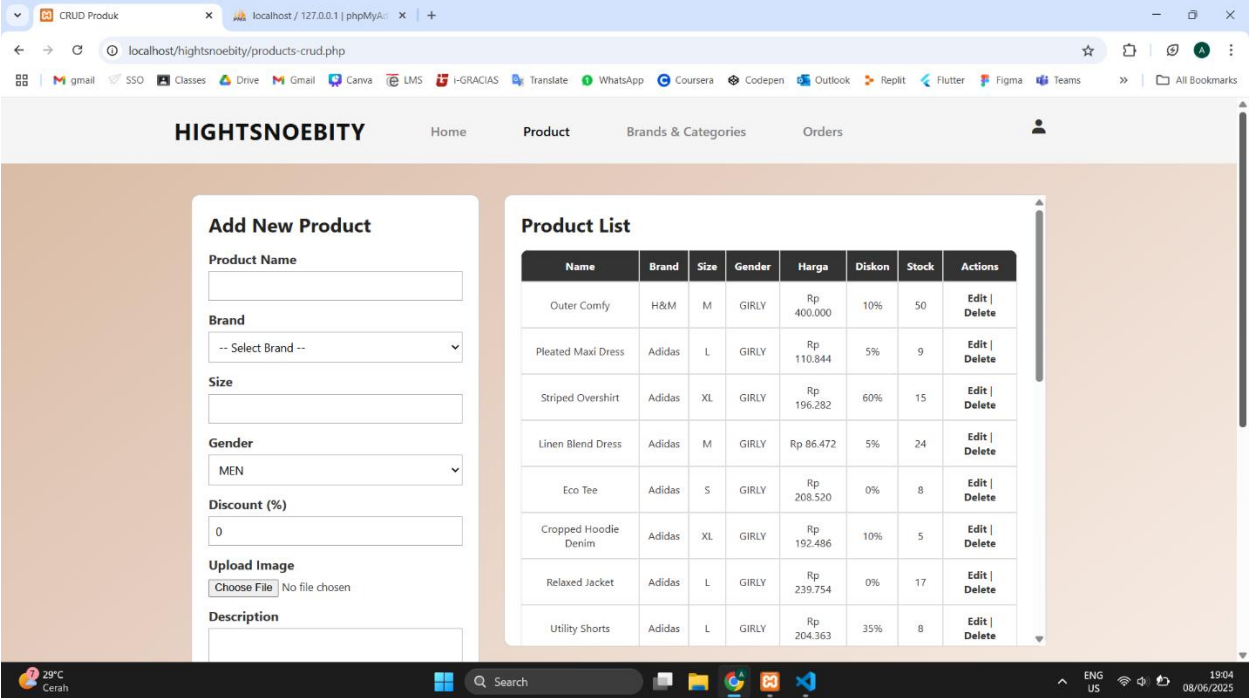

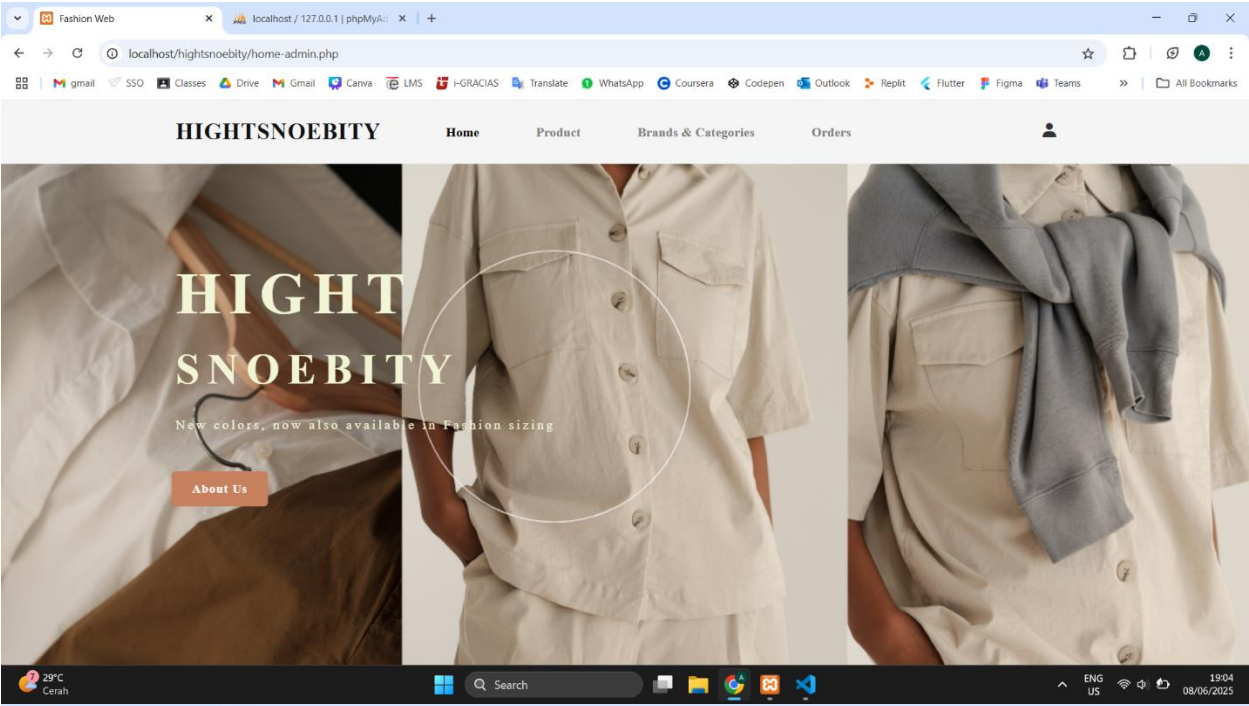

- Nama tabel: [Empty]
- Jumlah kolom: 4
- Buat: [Button]

**Bottom Screenshot: Database Designer**

The bottom screenshot shows the 'Database Designer' view for the `highsnoebity` database. It displays a diagram of the database structure with the following tables and their attributes:

- `highsnoebity brands`: `id` (int(11)), `name` (varchar(100)), `image_path` (varchar(255)).
- `highsnoebity products`: `id` (int(11)), `name` (varchar(100)), `brand_id` (int(11)), `size` (varchar(10)), `gender` (enum('MEN', 'GIRLY')), `discount_price` (tinyint(3) unsigned), `image_path` (varchar(255)), `description` (text), `stock` (int(11)), `harga` (decimal(10,2)).
